

PRODUCT BROCHURE

IdGates Full Height Turnstiles is built for easy installation. Constructed to withstand abuse of mass traffic flow with an affordable budget and maintenance cost. It is available in two versions:
Lite – cost effective model and the **Standard** version with extra side guide.

IdGates Glass Full Height Turnstiles with a classic view to enhance the entrance to a building. Function like a normal Full Height turnstile, with glass blade instead of metal rod.

IdGates Retractable Barrier is similar to most Flap Barrier, with the added ability to support high glass panels. This effectively provides extra protection, prevent jump over, passing of subversive item across the barrier, etc. The Glass Gate retracts into the pedestal to provide maximum passage width.

IdGates Flap Barrier, this is a waist-high Flap Barrier system is elegant in appearance and yet meet the stringent specification of high security, safety and fast traffic throughput. Its Glass Barrier retracts into the pedestal to provide maximum passage width.

IdGates Swing Gate Barrier with glass panel fitted at the middle of the passage; is designed to swing away from the pedestrian. With its matching side glass panels, it brings out the “transparency” of the passage to match the aesthetic of its surrounding.

IdGates Tripod Turnstiles comes in two main models:
Bridge – with long profile box enclosure.
Standard – with small profile enclosure. Choice of fully automatic motorised operation. Or Semi-automatic operation.

Bi-Directional – Anti Tailgate – FIRE Escape – Indoor/Outdoor Use* - Stainless Steel Enclosure – Choice Of Pedestal Top - Made In Europe - CE Certified
